ABOUT THE EVENT

Many organizations face the difficult task of selecting the program. What are the differences among the programs, where these come from, what advantages each provide? These recurrent questions could have a very simple answer. During the presentation, we saw what are the origins of Lean, Kaizen and Six-sigma. A conceptual structure will be presented so all programs could be understood and compared with. At the end of the presentation, the participants had a better understanding of

differences and similarities among these programs and would forge an opinion about what would be useful for their organization. The event had some special guests from ASQ 0401 Montreal Section, *Mr. Robert Demers* and *Mr. Raymond E. Dyer*. It was a great pleasure having them with us. It made the session more informative.
