

## ASQ Montreal Section Education Program 2019

*Having ASQ certification gives you an edge in the market and can significantly increase your income.*

ASQ Certification often leads to higher paying employment. The money invested in education and certification increases chances of finding employment quickly in the downsizing environment we live in. People who take the section-sponsored refresher courses and spend at least twice as much time as spent in the classroom on self-study, have an 80%, or better, chance of passing the examination on the first attempt.

**Certified Quality Engineer** Topics include: quality concepts, cost of quality, human resources, team formation and group dynamics, inspection, metrology, sampling, reliability, quality standards, quality audit, statistics, design of experiments, process improvement, liability, and modern management methods for improving quality.

**Certified Six Sigma Black Belt** Topics include: quality concepts, cost of quality, enterprise wide deployment, business process management, project management, team formation and group dynamics, define, measure, analyze, improve, control, lean enterprise, statistics, design of experiments, and design for six sigma.

**Certified Six Sigma Green Belt** Topics include: quality concepts, cost of quality, enterprise wide deployment, business process management, project management, team formation and group dynamics, define, measure, analyze, improve, control, and statistics.

**Certified Manager of Quality/Organizational Excellence** Topics include: quality concepts, quality planning, customer focus, quality standards, project management, cost of quality, team formation and group dynamics, human resources and improvement.

**Certified Quality Auditor** Topics include: quality concepts, team formation and group dynamics, management responsibility, audit objectives, audit preparation, audit conduct, audit reporting, sampling, and basic statistics.

**Certified Quality Inspector** Topics include: quality concepts, team formation and group dynamics, geometry, metrology, reading drawings, mechanical processes, statistical process control, inspection, and sampling.
